1. March

March in towards the stage, loudly (as long as it takes to reach the stage)
Speed is free but must be constant.

Continue marching and gradually fill in the space. (min. 20'')

Proceed to 2.
Do not stop marching.

2. Instability

Change to erratic movement, gradually. (min. 10'')

Walking movements should be as different and individual as possible.

Steps should produce some kind of audible sound.

Singers are free to use sounds like:

- long [s], [ʃ], or [ks], with free dynamics;
- staccato/marcato [p], always ***mf*** or above.

Any sounds used should be in the erratic character.

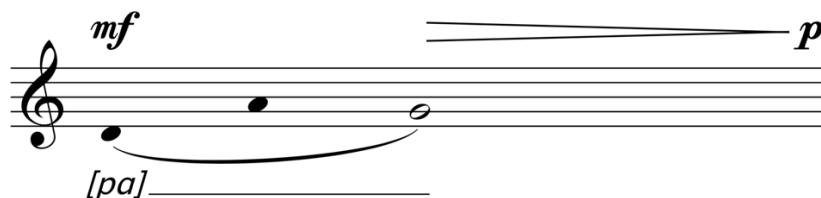

Walk erratically. (until 4.)

Each singer should develop their individual movement (and character) as far as possible.

Should any crashes with other singers happen react as naturally as possible, behaving as if crashing to someone in the street. Adapt any sound reactions to the sound context being performed. Crashes should not be provoked.

3. Pax solo

Solo: At any time stop at the centre of the stage and **sing**: (free duration)

Durations ad. lib.
